

# Prepared by Matthew Bloemer

# FEMA Region 6 Weather Threat Briefing

Friday, October 26, 2018

**Disclaimer:** The purpose of this briefing is to provide a <u>Regional</u> weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information.

To find your local NWS forecast office, go to <u>www.weather.gov/srh</u>.

## Summary of the Upcoming Week

#### **Today**

No significant weather impacts expected.

#### Saturday - Tuesday

No significant weather impacts expected.

#### **River Flood Status**

- Moderate to Major River flooding is ongoing or expected across Texas.
- Points along the Nueces river in STX will continue in Major Flood at times over the next week as water moves downstream. At Tilden, a continued slow rise in major flood is expected; evacuation of livestock and a few residential properties may be required.
- The Trinity River at Liberty is in Moderate flood near Long Lake. Flood wave will move downstream through this weekend with impacts of agricultural flooding and several subdivisions above Liberty likely flooding.

#### **Tropical Outlook**

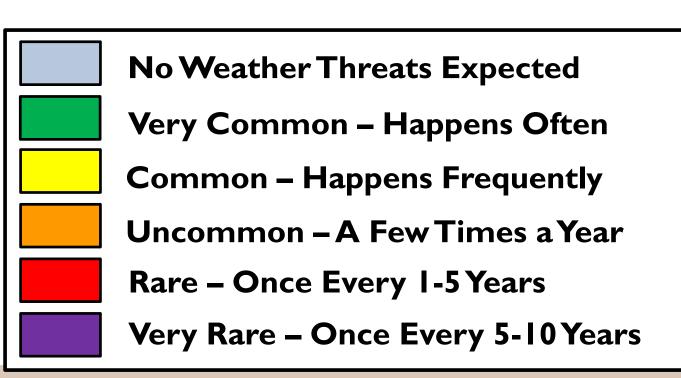

• An area of potential development has been identified in the Central Atlantic. Any development should remain away from the US coastline.

# FEMA Region 6 Threat Matrix

Oct 25, 2018 - Oct 29, 2018

DAY / THREAT	FRI	SAT	SUN	MON	TUE
Severe Storms					
Heavy Rain / Flash Flooding					
Winter Weather					
Tropical Weather					
River Flooding	TX	TX	TX	TX	TX

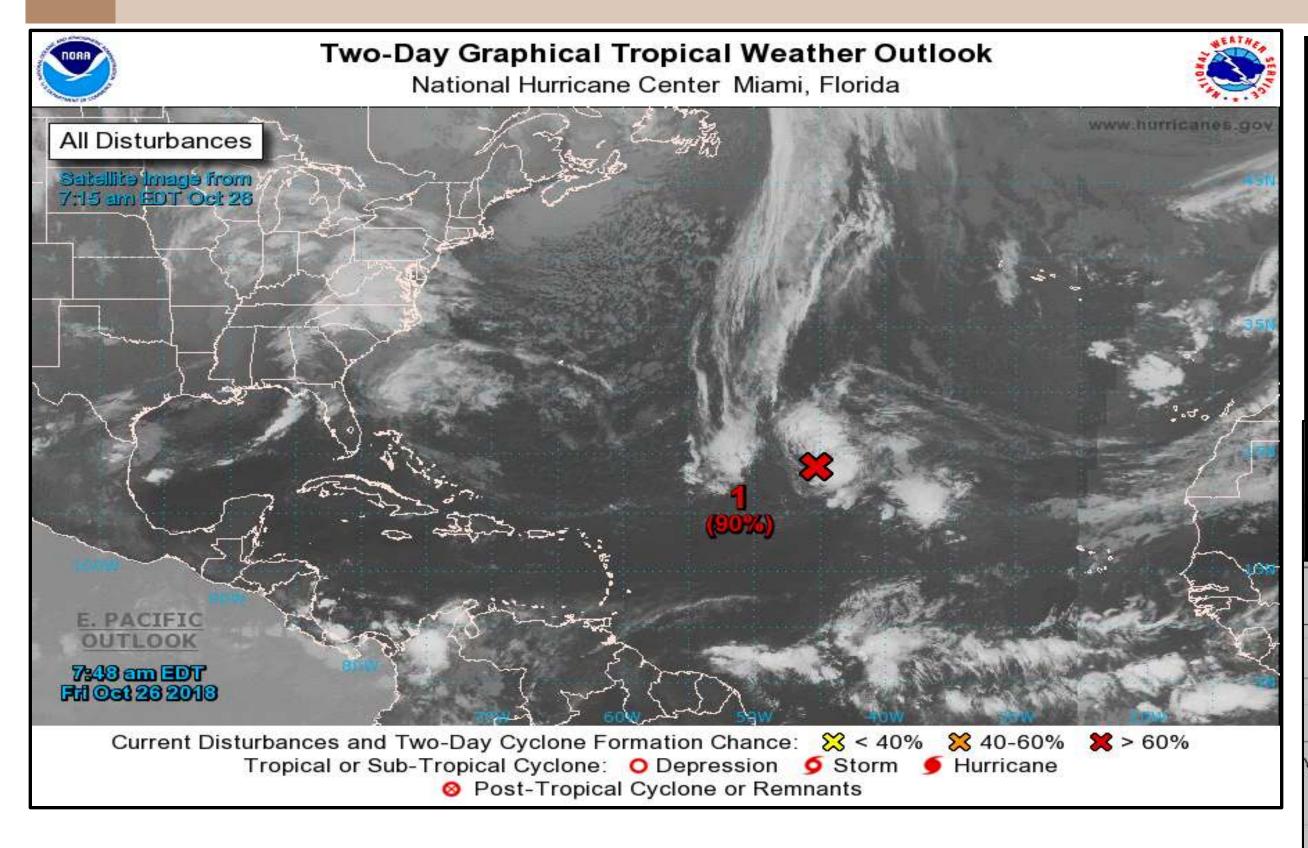

\*Threat levels are based on FEMA Region 6 criteria.

State or local threat level criteria may differ.\*

For more details on the colors in the threat matrix refer to the last slide in this briefing.

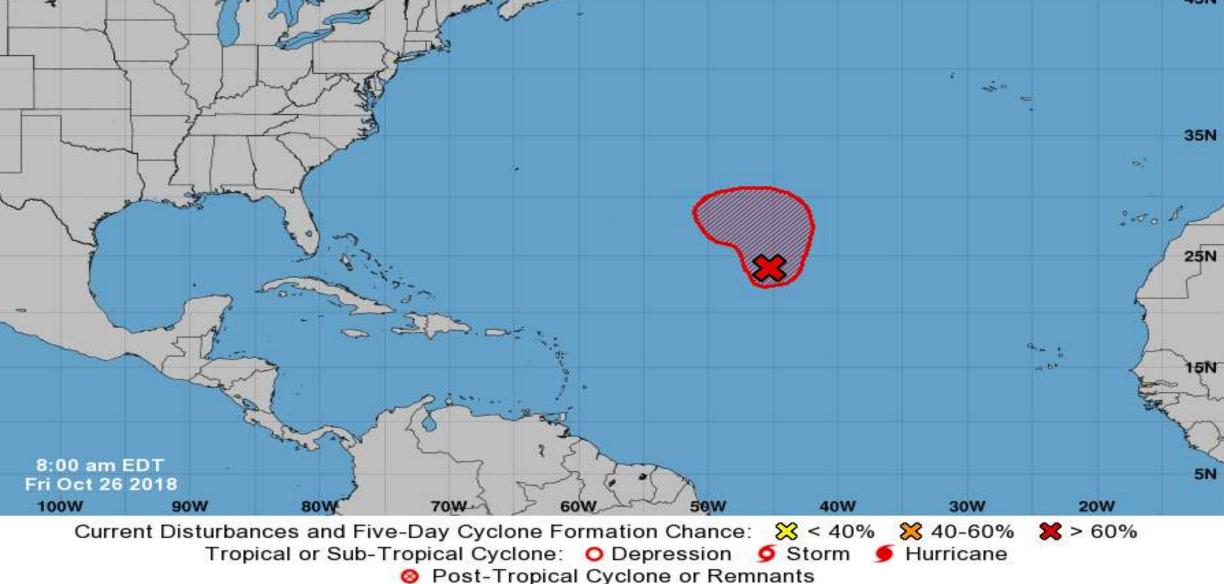

### Tropical Weather Outlook – Atlantic/Gulf

A LOW PRESSURE SYSTEM LOCATED ABOUT 1200 MILES EAST-NORTHEAST OF THE NORTHERN LEEWARD ISLANDS HAS CHANGED LITTLE IN ORGANIZATION SINCE LAST NIGHT. HOWEVER, ENVIRONMENTAL CONDITIONS APPEAR CONDUCIVE FOR FURTHER DEVELOPMENT AND THIS SYSTEM WILL LIKELY BECOME A TROPICAL OR SUBTROPICAL CYCLONE LATER TODAY OR TONIGHT WHILE IT MOVES GENERALLY NORTHWARD OVER THE CENTRAL ATLANTIC. AFTER THAT TIME, THE LOW IS FORECAST TO TURN WESTWARD AND REMAIN WELL TO THE NORTH OR NORTHEAST OF THE LESSER ANTILLES THROUGH EARLY NEXT WEEK.

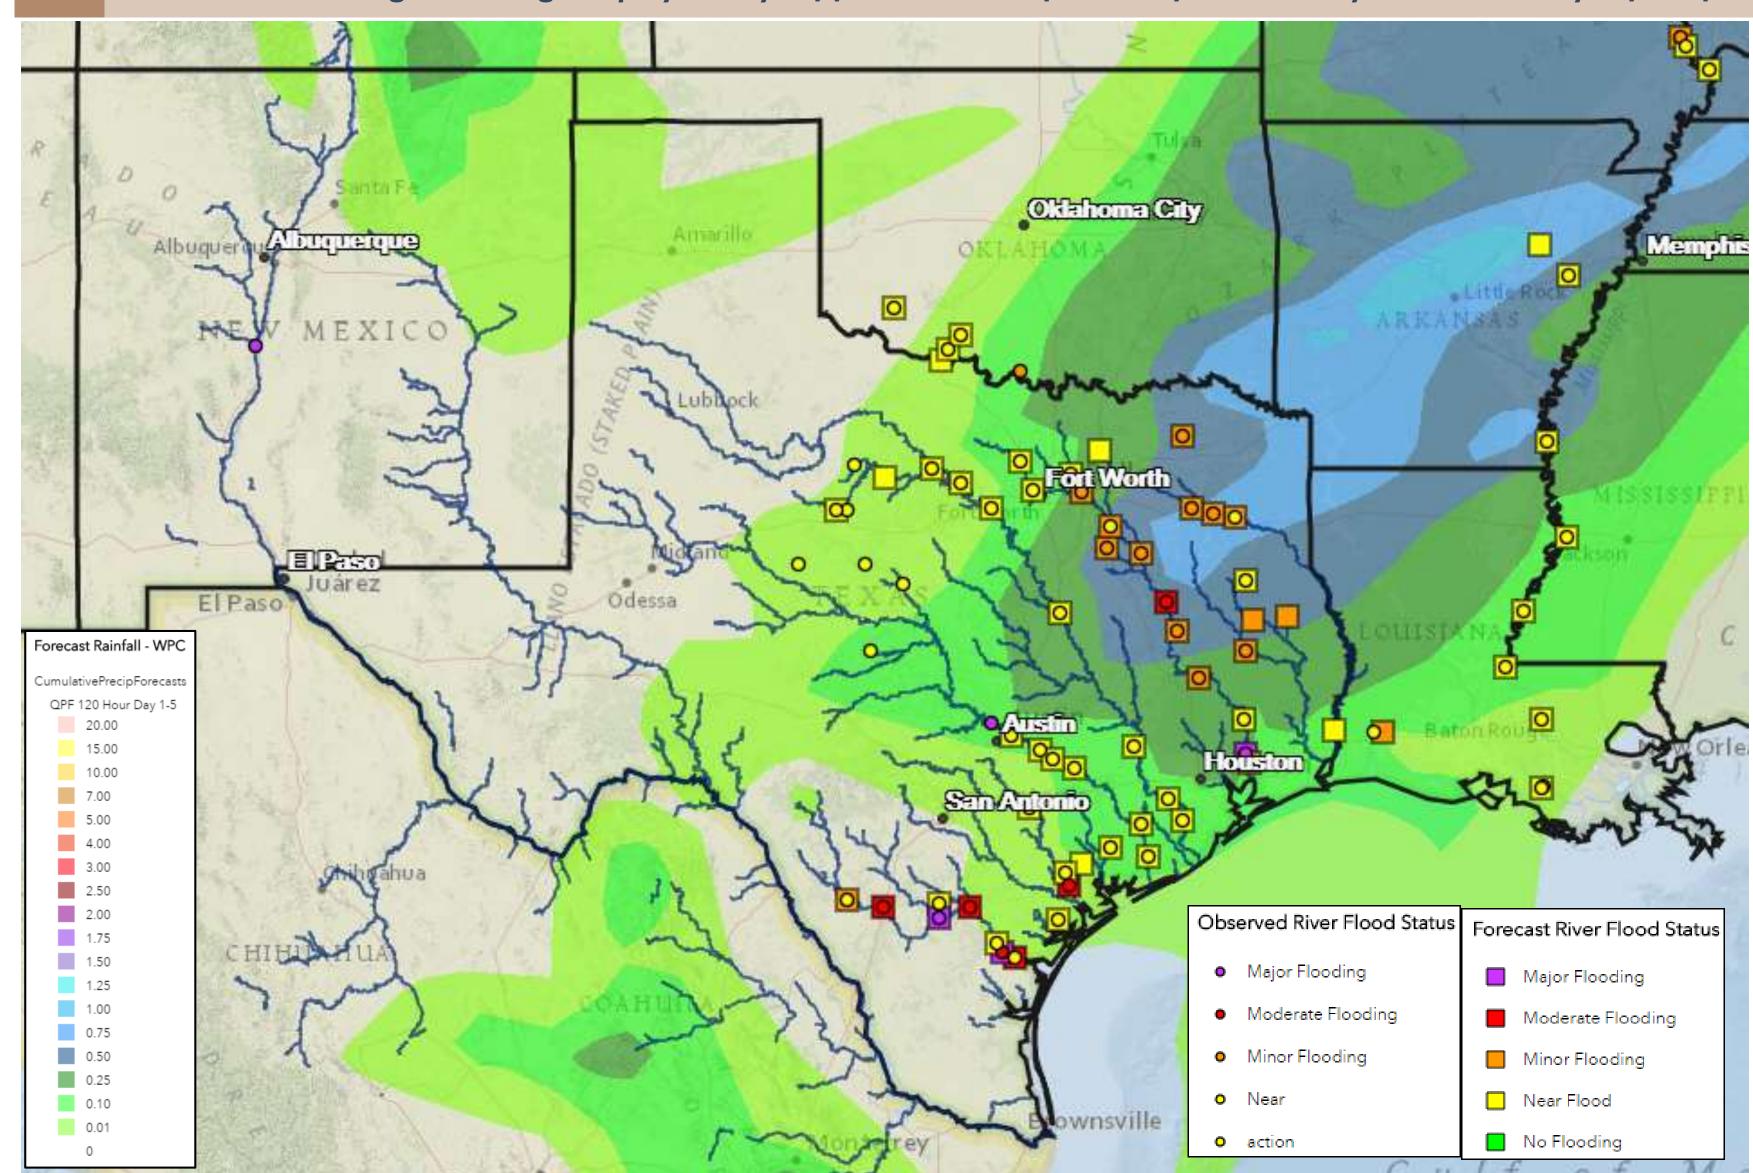

- \* Formation chance through 48 hours...high...90 percent.
- \* Formation chance through 5 days...high...90 percent.

### 5-Day Precipitation Forecast & River Flood Status

SR ROC REGIONAL OPERATIONS CENTER

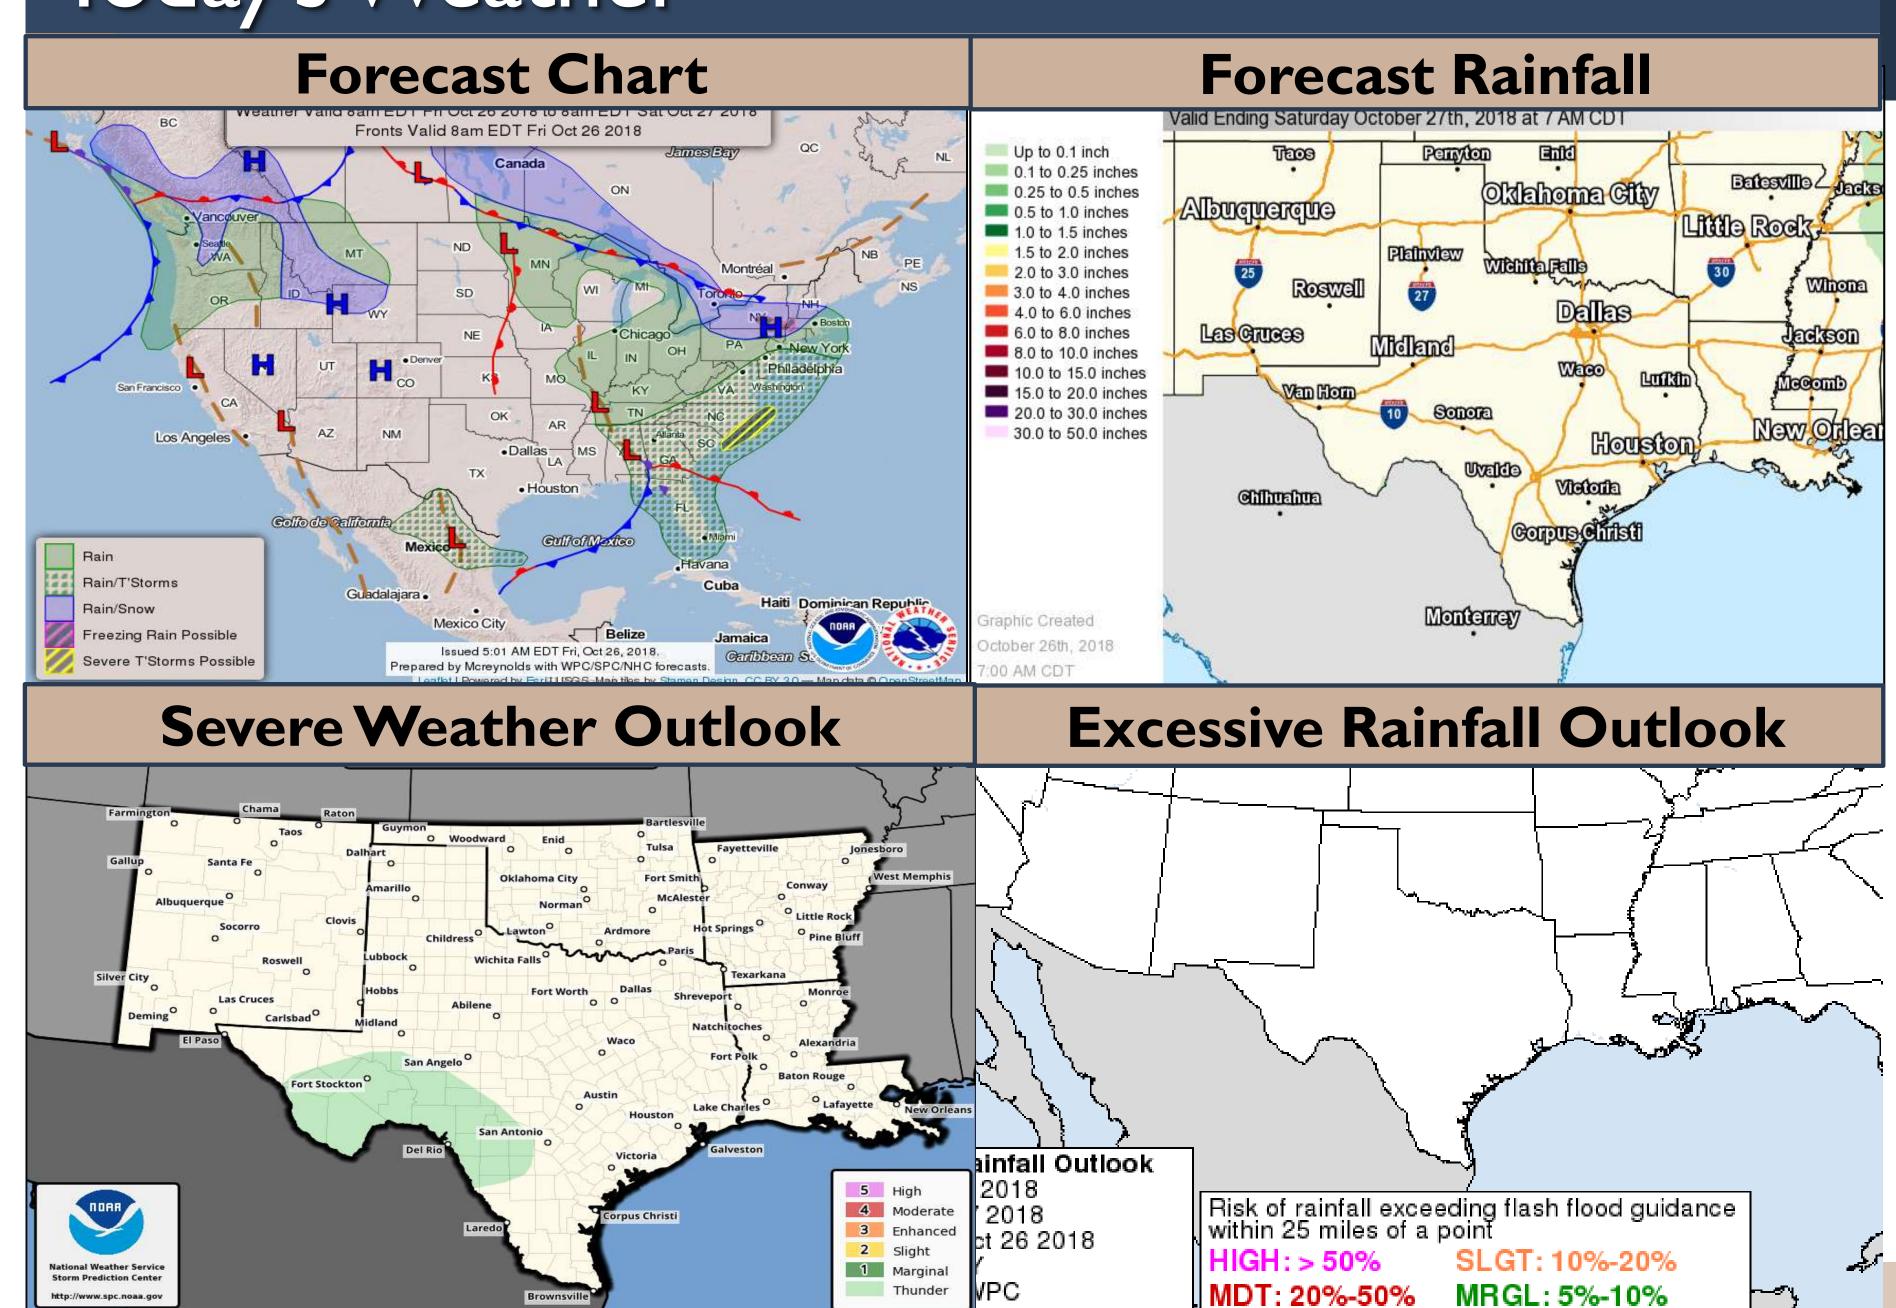

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

## Moderate to Major River flooding is ongoing or expected across Texas.

- Points along the Nueces river in S
  TX will continue in Major Flood
  at times over the next week as
  water moves downstream. At
  Tilden, a continued slow rise in
  major flood is expected;
  evacuation of livestock and a few
  residential properties may be
  required.
- The Trinity River at Liberty is in Moderate flood near Long Lake.
   Flood wave will move downstream through this weekend with impacts of agricultural flooding and several subdivisions above Liberty likely flooding.

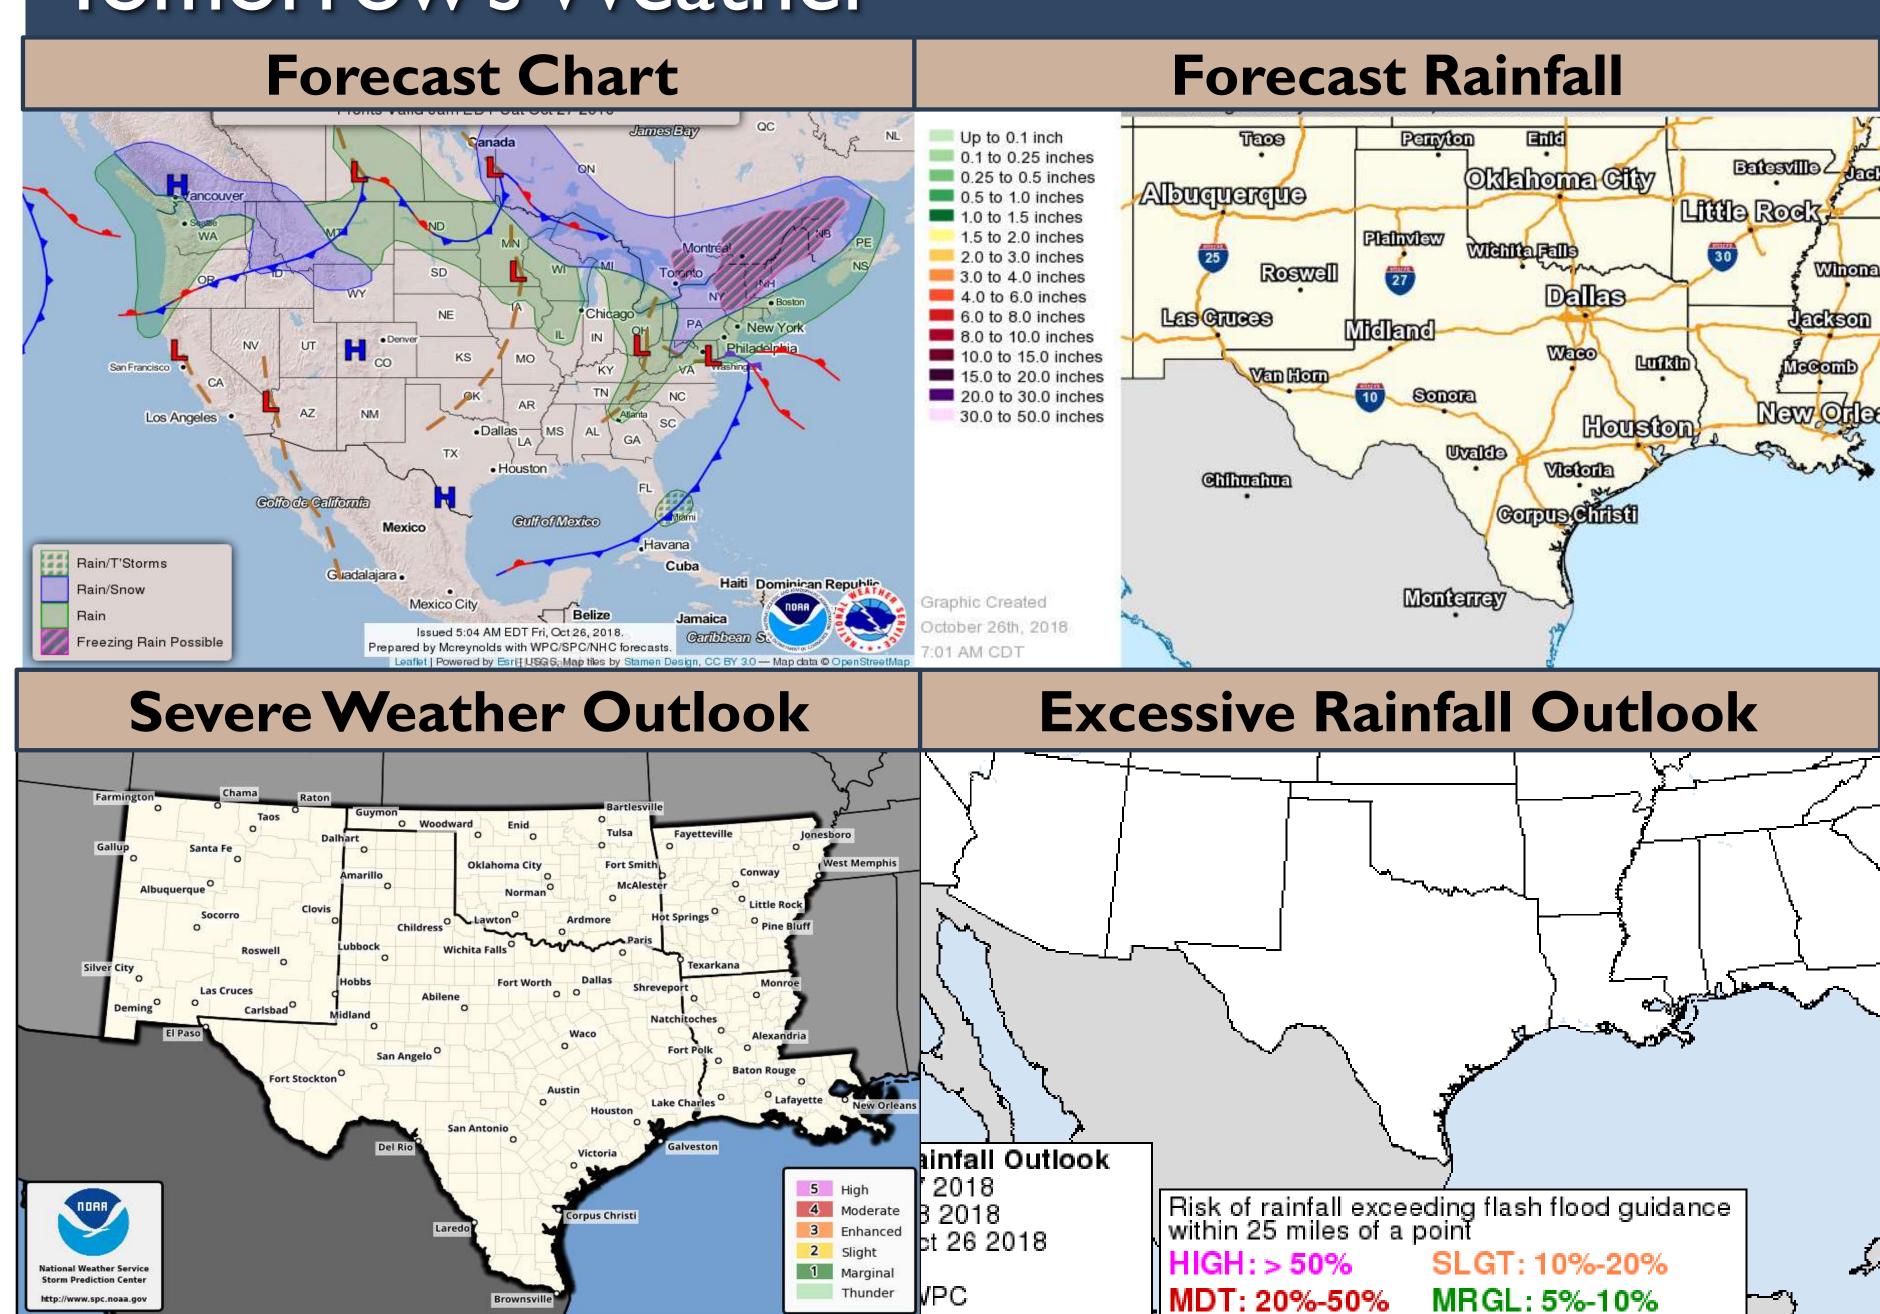

## Today's Weather

No significant weather impacts expected.

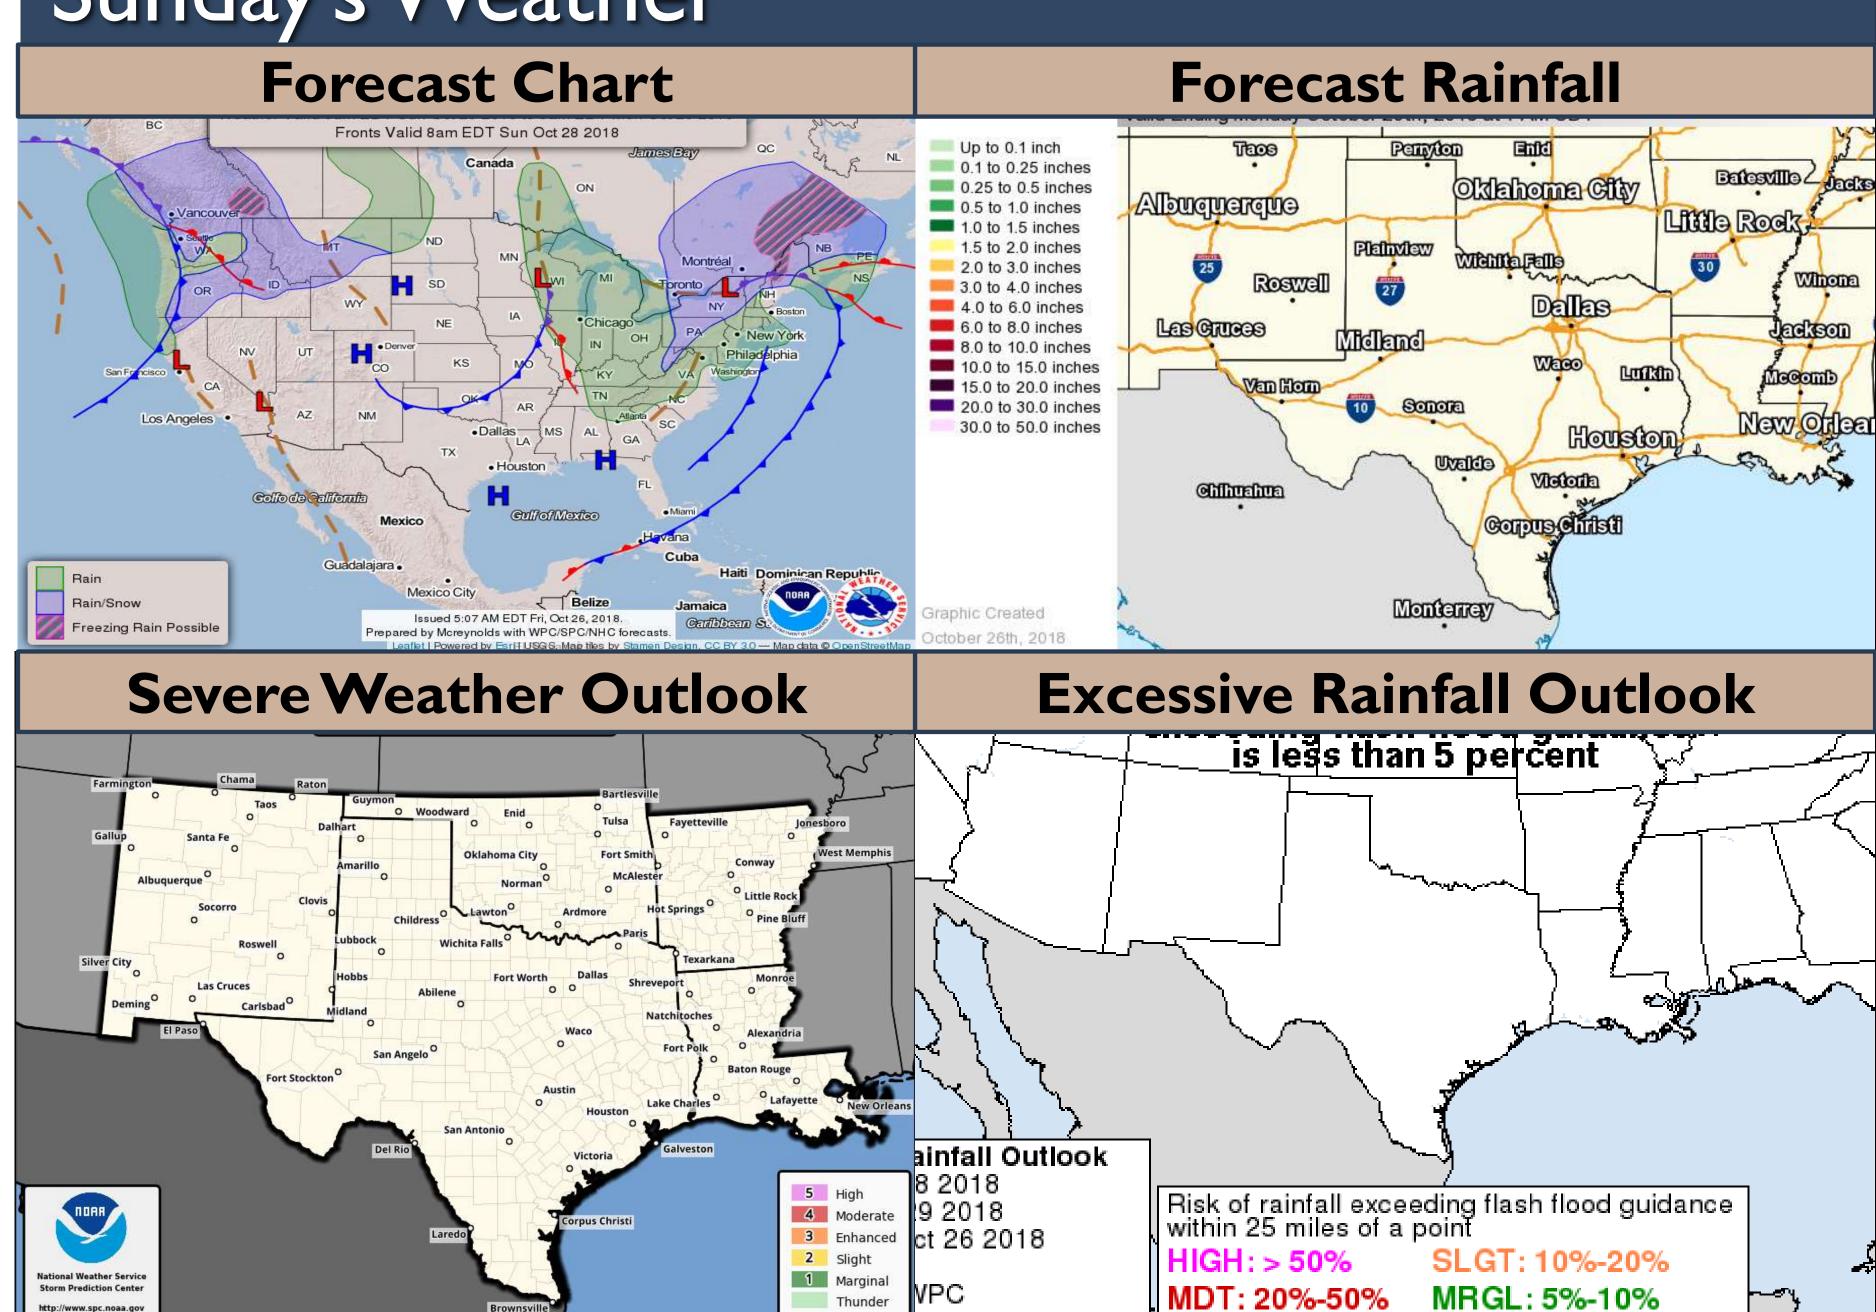

### Tomorrow's Weather

No Significant Weather Impacts Expected.

### Sunday's Weather

Thunder

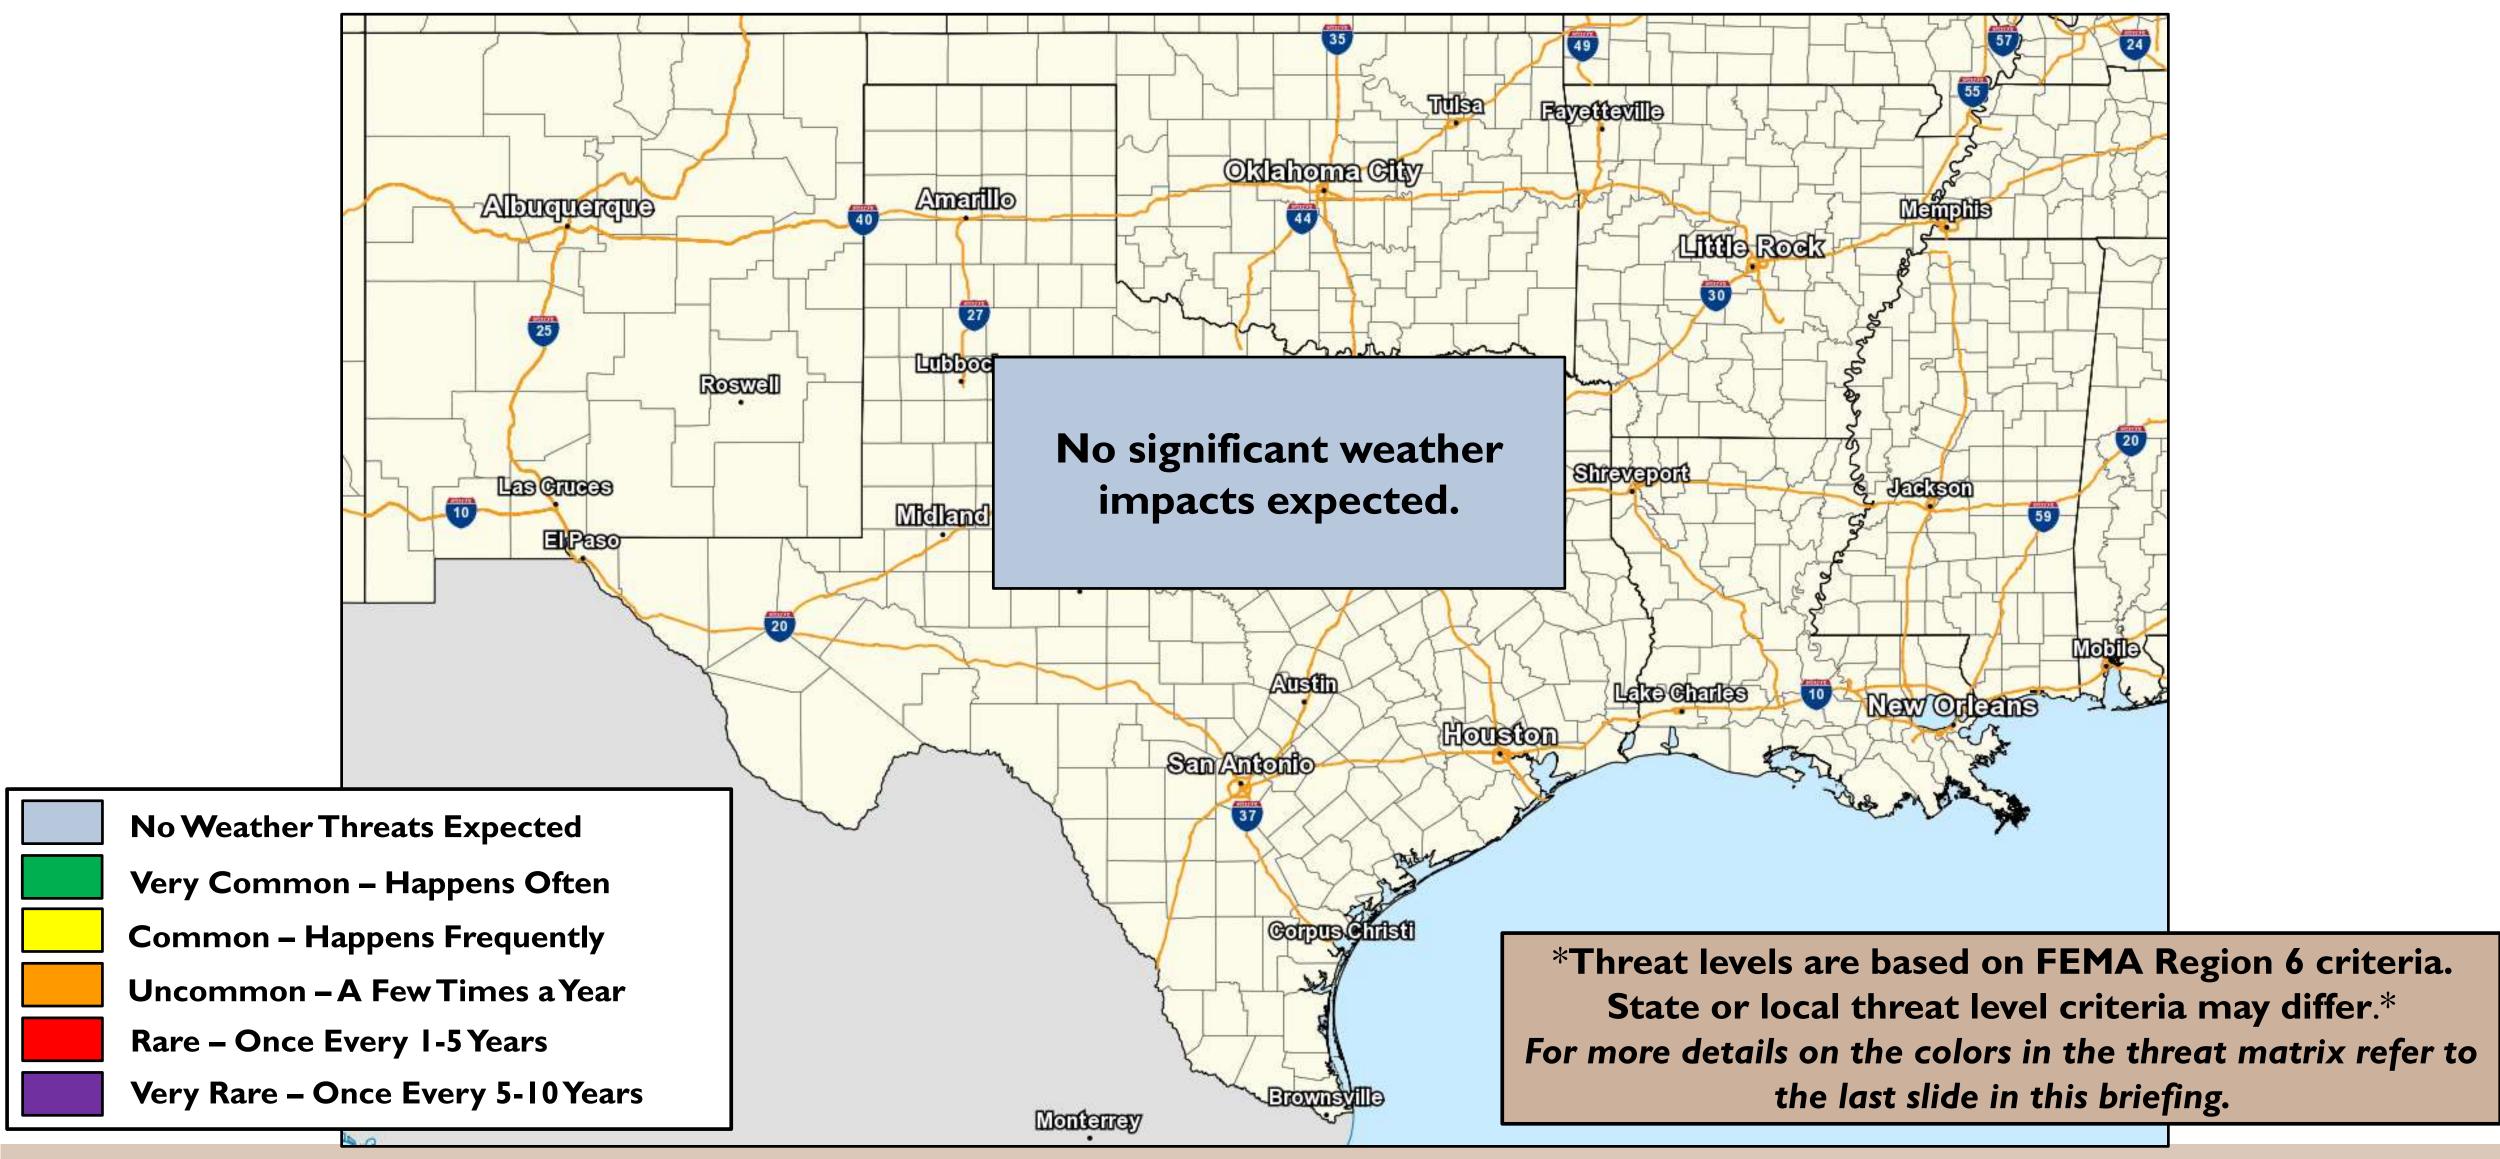

No Significant Weather Impacts Expected.

# Days 4-5 Weather Hazards

### **Monday - Tuesday**

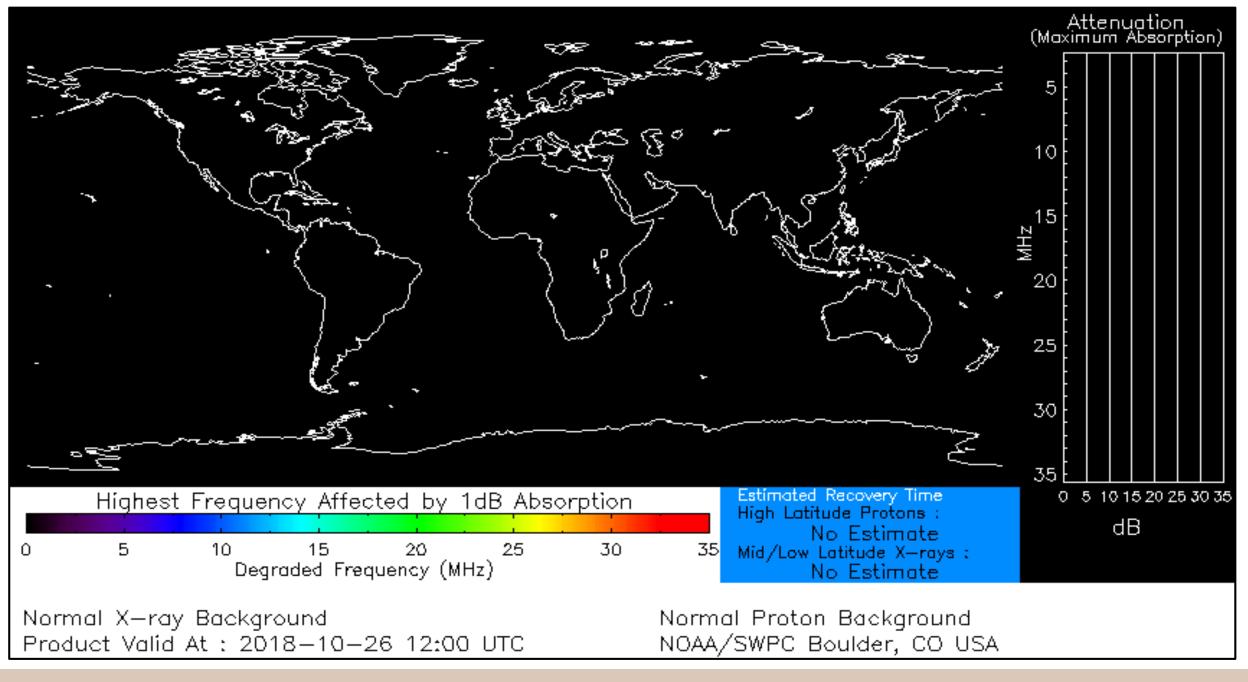

# Space Weather 3-Day Forecast

	Friday	Saturday	Sunday
Geomagnetic Storms	Quiet (Max Kp = 2)	Quiet (Max Kp = 2)	Quiet (Max Kp = 2)
Solar Radiation Storm (SI-S5)	1%	1%	1%
Radio Blackout (RI-R2)	1%	1%	1%
Radio Blackout (R3-R5)	1%	1%	1%

	Weather "Threat" Matrix						
Color	Definition	Criteria	Example(s)				
Green	Very Common Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	<ul> <li>Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees</li> <li>Something that happens almost every day in a particular season such as seabreeze storms in coastal TX</li> </ul>				
Yellow	Somewhat Common — Happens Frequently Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	<ul> <li>2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible</li> <li>Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1" hail</li> </ul>				
Orange	Uncommon — A Few Times a Year Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	<ul> <li>A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely</li> <li>Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail</li> <li>Some large fires reported, burn bans advertised, critical conditions expected</li> </ul>				
Red	Rare – Once every 1-5 Years Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	<ul> <li>A Category 1 hurricane will be moving towards the NW Gulf in the next few days</li> <li>Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail</li> <li>Large fires ongoing throughout the area with critical fire weather conditions expected to continue</li> </ul>				
Purple	Very Rare – Once Every 5-10 Years Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	<ul> <li>A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow</li> <li>Widespread severe storms expected, tornado outbreak probable with long- lived, very widespread and particularly intense storms</li> </ul>				

Criteria for the color codes in this briefing is to the left, please provide any feedback to
